Battery smoke detector, 9V DC, BSI

Marka: **Virone** | Symbol: **SD-1** | Ean: **5901752480896**

PRODUCT DESCRIPTION

A battery-operated smoke alarm, a device that detects smoke particles in a closed room and alerts us to the danger at an early stage of a possible fire. The photoelectric smoke detector will work well as an additional means of monitoring the danger and thus protecting you wherever there is a risk of fire.

The device is small and lightweight, so it is recommended for self-assembly and operation. Powered by the 6LR61/ 9V battery included in the set, the device signals danger - the alarm volume is 85dB, but it will also tell

ORNO GROUP Sp. z o. o. All rights reserved.

us when to replace a depleting battery. In addition, it also features an LED to visually signal the alarm.

The sensors of the detector have a lifespan of up to 10 years and the entire device complies with the European standard 14604:2005/AC1:2008, which has been certified by BSI-KM514007. The battery-operated smoke detector also has a TEST option to check the correct operation of the device.

The magnetic mounting plate (OR-DC-622), which fits many models of carbon monoxide, smoke or gas detectors, is ideal for convenient placement in the room. It enables quick and easy self-mounting of the detector without the need to drill holes in the wall. It will also work well in caravans, boats or on concrete walls or ceilings.

TECHNICAL DATA

General information:

Operating principle:	Optyczny
Supply voltage [V]:	9
Voltage type of supply voltage:	DC
With backup battery:	tak
Backup battery included:	Inne
Loudness [dB(A)]:	85
Mounting method:	Montaż powierzchniowy
Self-adhesive:	nie
Height [mm]:	35
Diameter [mm]:	107
Colour:	Biały
Smoke switcher:	tak
With orientation lighting:	nie
Type of test-/pause button:	Kombinowany
Degree of protection [IP]:	IP20
Standalone:	tak
Current supply primary:	Bateria/akumulator
Compliance with standards::	EN 14604:2005/AC1:2008
