RECORDING

TOUCHSCREEN **PANEL**

The intuitive touchscreen gives you instant access to all features. A simple swipe is all it takes to change settings. Operating the device is as easy as using a smartphone – convenience that adds an extra layer of safety while driving.

MIRROR-MOUNTED CAMERA

A discreet solution – the camera is built into the rear-view mirror, preserving your field of vision and blending seamlessly with your car's interior, just like factory-installed equipment.

HDR IMAGING

The HDR function delivers outstanding image quality in any lighting conditions. Capture more details, even in bright sunlight or deep shadows. Colors remain vivid and contrast perfectly balanced, ensuring your recordings always look professional.

A blue car is shown from a front-three-quarter view, partially obscured by a semi-transparent blue overlay. In the top right corner, there is a circular inset showing a close-up of a black camera lens mounted on a car's body. The background of the entire image is a blurred outdoor scene with green grass and trees.

PARKING **MODE**

Protect your car even when you're away. The camera automatically starts recording if it detects motion or an impact.

WIDE-ANGLE LENS

Covers the entire road and roadside, minimizing blind spots for increased safety in any situation. Nothing escapes your view.

150°

LOOP RECORDING

No need to worry about running out of storage – the camera automatically overwrites the oldest recordings. You can be sure the most important footage is always saved, making it the perfect solution for long trips.

4K RECORDING

Enjoy the highest recording quality in stunning 4K resolution.
Capture every detail – from license plates to small
road signs – with sharp, lifelike clarity.

G-SENSOR

The built-in G-sensor automatically secures recordings in the event of a collision or sudden braking. Footage is locked from deletion, ensuring your accident evidence is safe and always accessible.

FULL HD REAR CAMERA

Full control over what's happening behind your vehicle. The rear camera records in Full HD, delivering clear, detailed footage. This feature helps you reverse carefully and park safely.

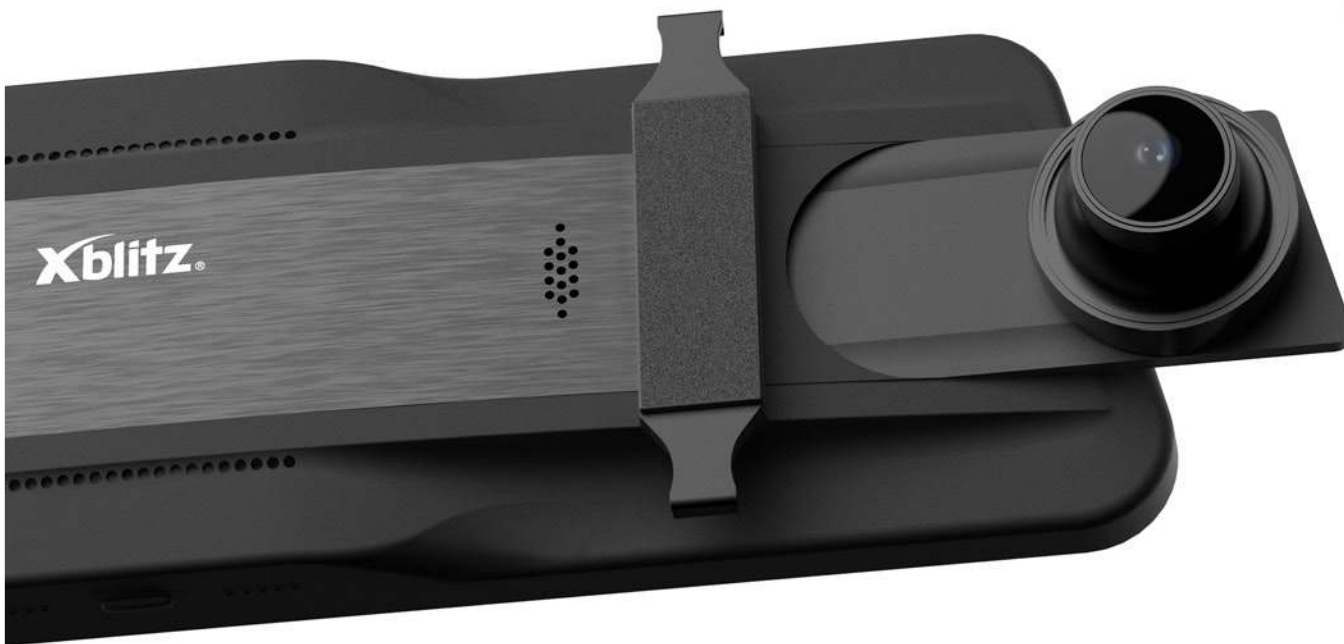

WIFI APP

Connect the dash cam to your smartphone and manage recordings wirelessly. Browse and download videos directly to your phone – fast, easy, and intuitive thanks to the built-in Wi-Fi module.

MICROSD CARD SUPPORT

Compatible with microSD cards up to 128 GB – plenty of space for your journey recordings. Choose the capacity that fits your needs and record without interruptions or stress.

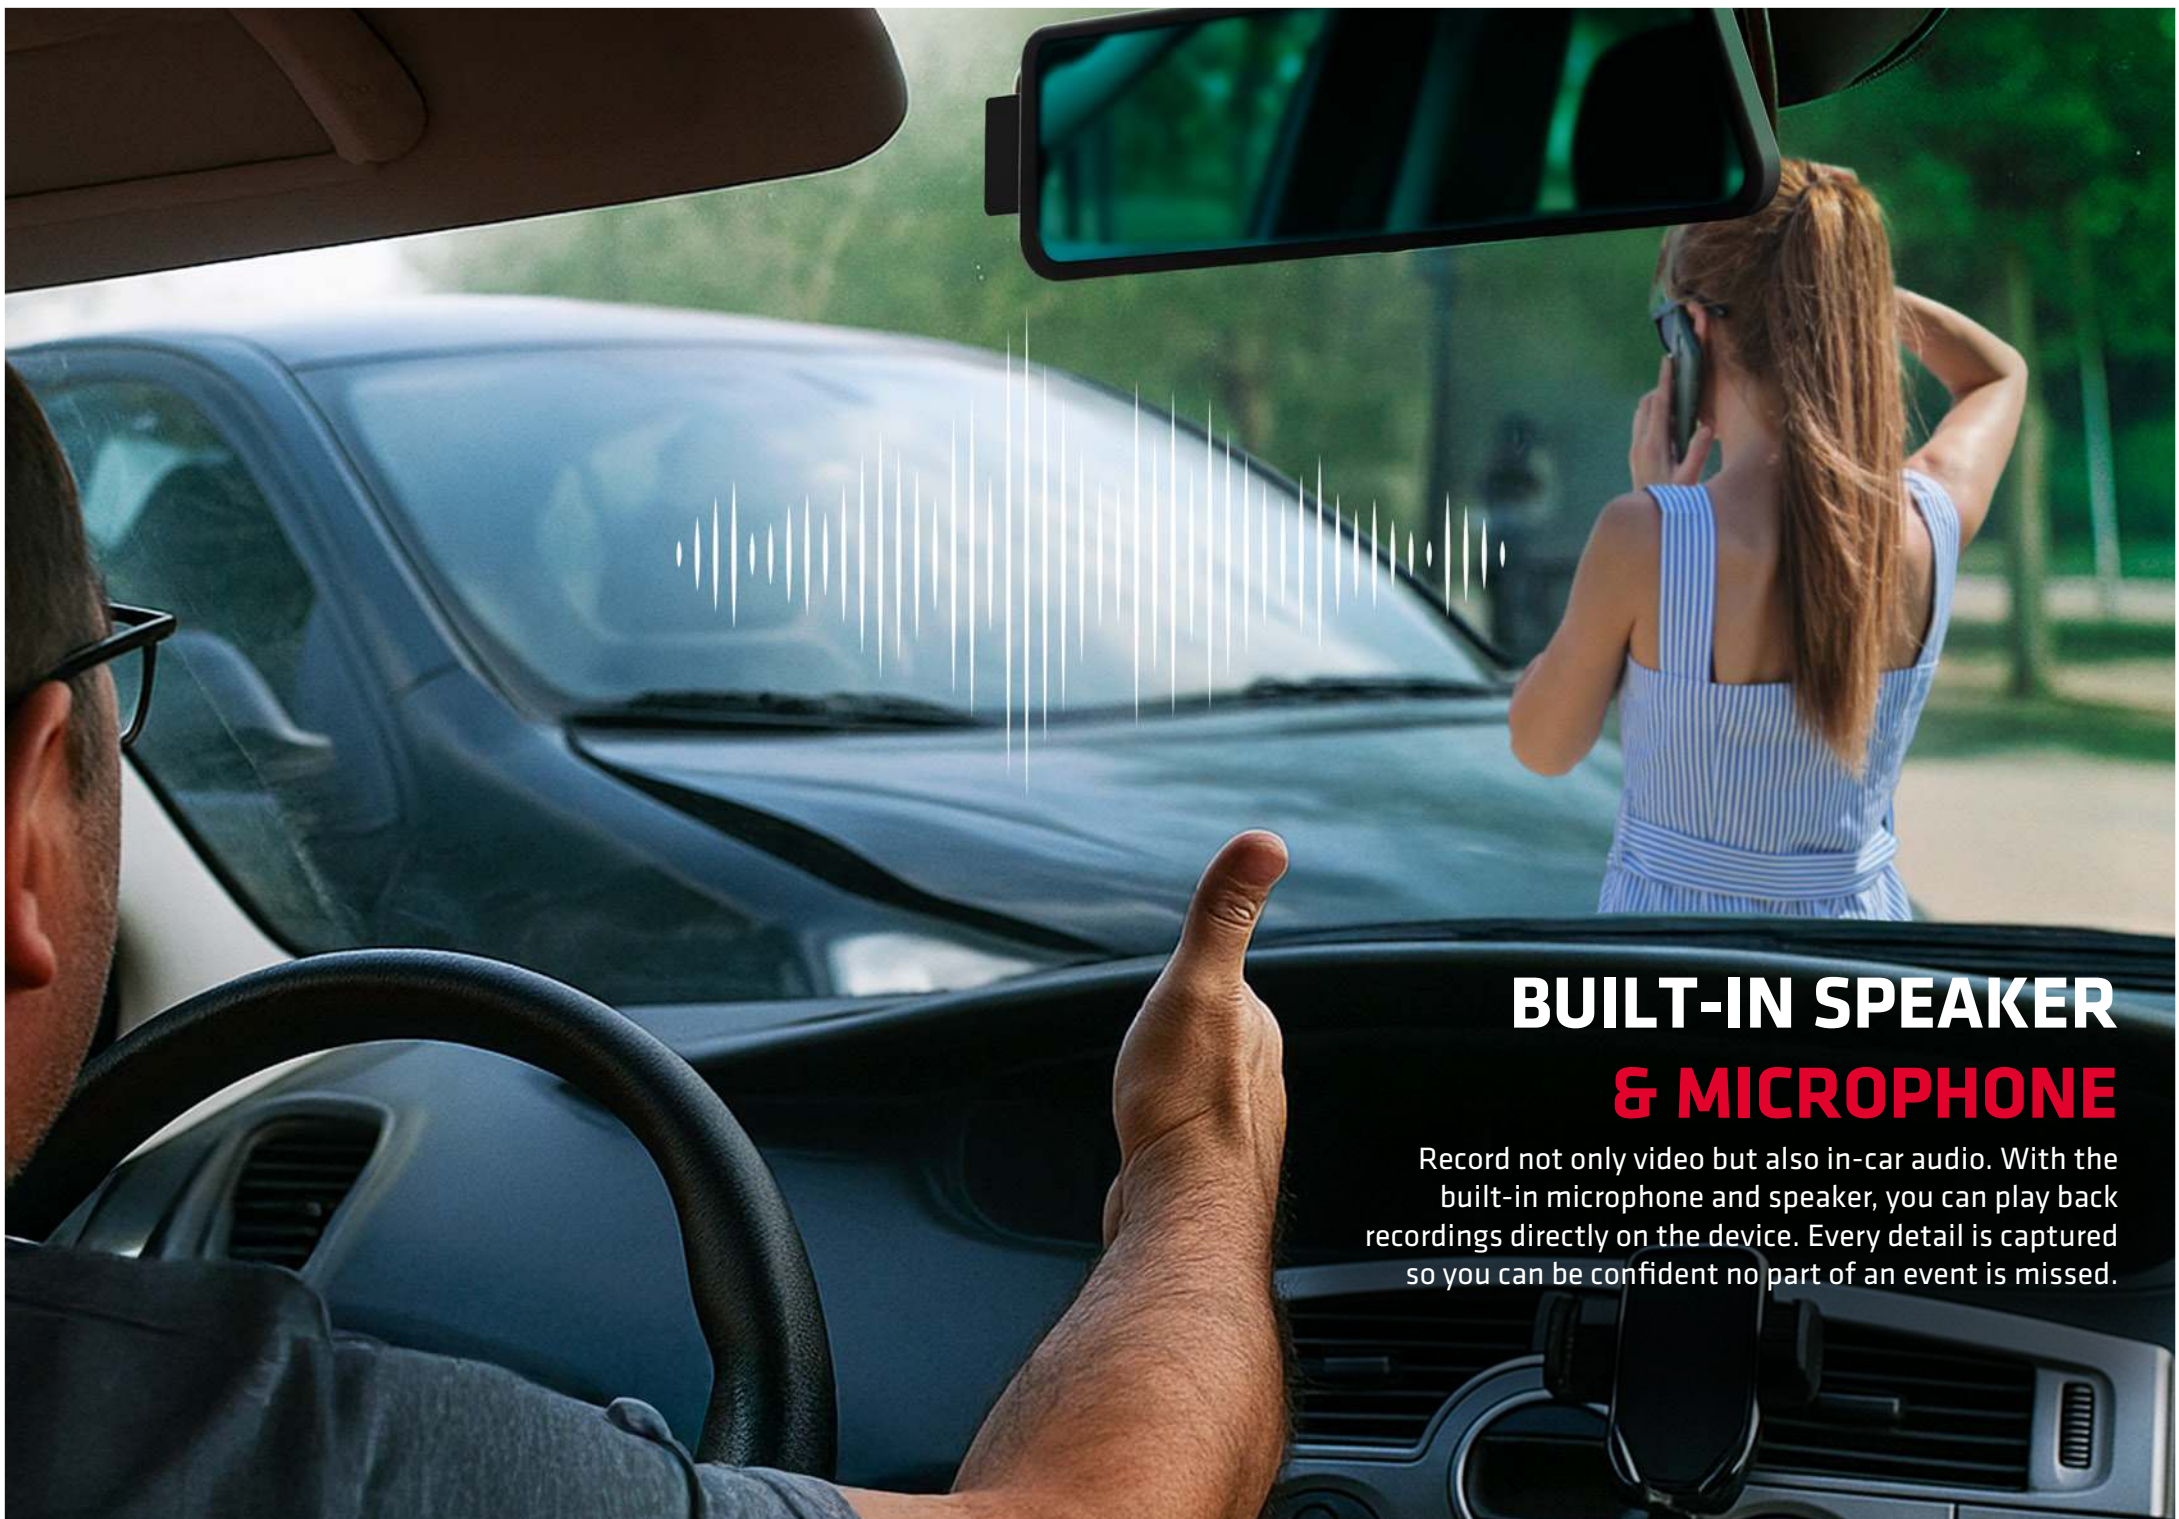

ADJUSTABLE LENS

The extendable lens lets you set the perfect recording angle, ensuring the camera always captures exactly what's needed.

BUILT-IN SPEAKER & MICROPHONE

Record not only video but also in-car audio. With the built-in microphone and speaker, you can play back recordings directly on the device. Every detail is captured so you can be confident no part of an event is missed.
