FX6

EXCLUSIVE

DISTINCTIVE FORM

The design of the FX6 is based on straight lines and visible design elements. It is a solid, functional form that fits well with the styling of contemporary cars.

TWO WAYS OF CHARGING

The Xblitz FX6 Exclusive supports two charging methods: classic wired charging and inductive charging. This solution allows you to match the charging method to your specific phone model and ensures stable power supply while on the move.

AUTOMATIC **ARM OPENING**

A built-in mechanism opens the handle arms automatically, making it easy to place and remove the phone. The system works quickly and without delay, even when the vehicle is switched off.

max 15W

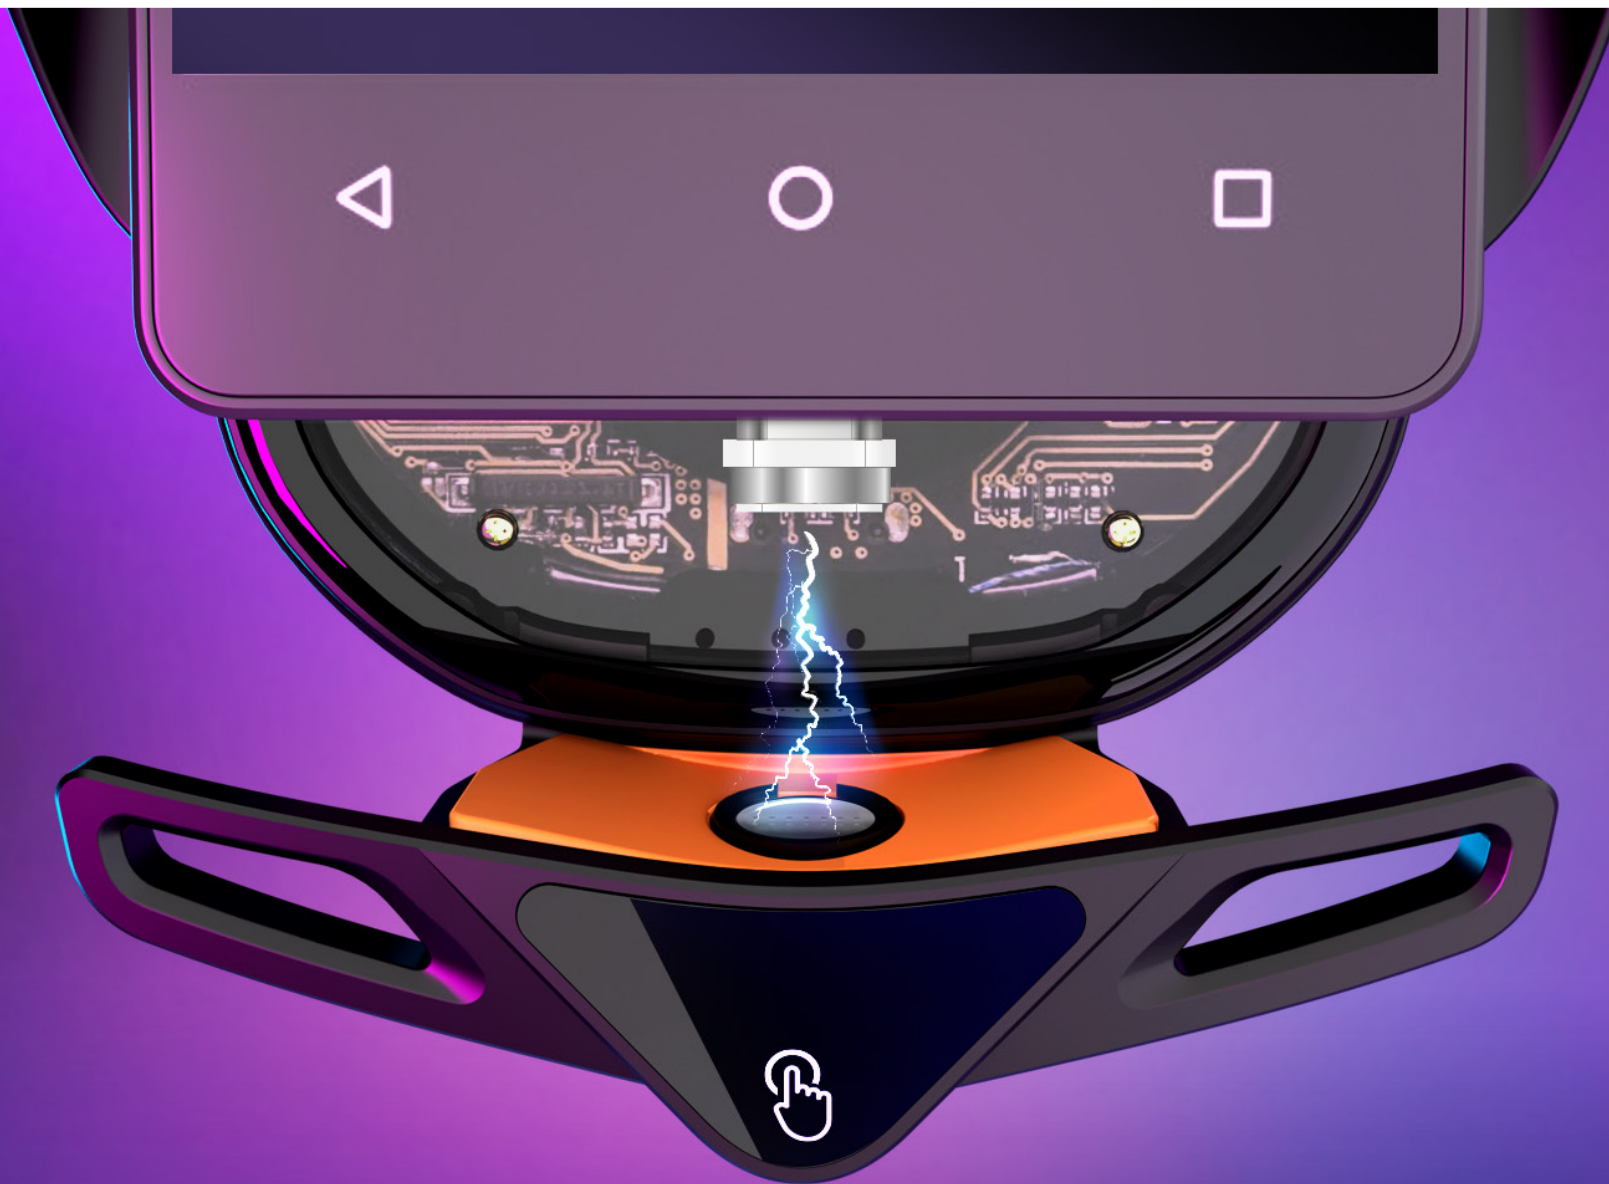

**CHARGING
POWER
15W and 9V**

The Xblitz FX6 Exclusive holder allows wireless charging with a maximum power of up to 15 watts. The device automatically selects the appropriate power level depending on the smartphone. This ensures efficient power supply without the risk of overheating.

RAPID ASSEMBLY

Mounting the Xblitz cradle takes just a few seconds. The clever solution saves time and positions the phone so that the driver has easy access to it when using the navigation while driving.

USB-C

MICRO-USB

LIGHTNING

USB-C and 3 MAGNETIC CONNECTORS

Three magnetic connectors are included: USB-C, Lightning and Micro-USB, which ensure compatibility with most phone models on the market. They insert directly into the phone's port, ensuring a quick connection to the holder. This gives you the option of wired charging.

ALWAYS READY FOR ACTION

Thanks to the built-in battery, you can easily open the arms of the handle even when you do not have access to power. It's a feature that makes it easy to use in any situation.

FX SERIES

Each holder in the Xblitz FX series is a thoughtful solution for drivers who value order, convenience and reliability. Durable materials and functional design make it safe and comfortable to use.

TECHNICAL DATA

MODEL: FX6 EXCLUSIVE

Material:	ABS+PC
