THREE CAMERAS. FULL CONTROL OF THE ROAD SITUATION

The Xblitz Future 3CH car dash cam with HDR and STARVIS 2 IMX678 technology delivers outstanding image quality – recording everything happening in front of, behind, and inside the vehicle. Nothing escapes your attention, day or night. 4K recordings capture even the smallest details, such as license plates or the exact course of an incident. In the event of a collision, you have clear footage from every angle that can serve as crucial evidence.

EXCELLENT VISIBILITY IN ALL CONDITIONS

The advanced Sony STARVIS 2 IMX678 sensor combined with HDR technology ensures a sharp and readable image regardless of lighting conditions – both in bright sunlight and after dark. The Xblitz Future 3CH dash cam effectively reduces overexposure and enhances visibility in darker areas of the image, ensuring recordings remain detailed even in low-light conditions. Key moments will always be captured exactly as they should be.

QUALITY THAT CAPTURES EVERY DETAIL

Record in high resolution from every angle: 4K at the front, 2K at the rear, and Full HD inside the vehicle. The Xblitz dash cam offers image quality that leaves no room for doubt. The front camera in 3840×2160 captures the finest details, the rear camera in 2560×1440 provides clear footage of the situation behind the vehicle, while the internal FHD camera with IR LEDs guarantees a sharp image even after dark. With this setup, you can be sure every recording will be detailed, clear, and useful.

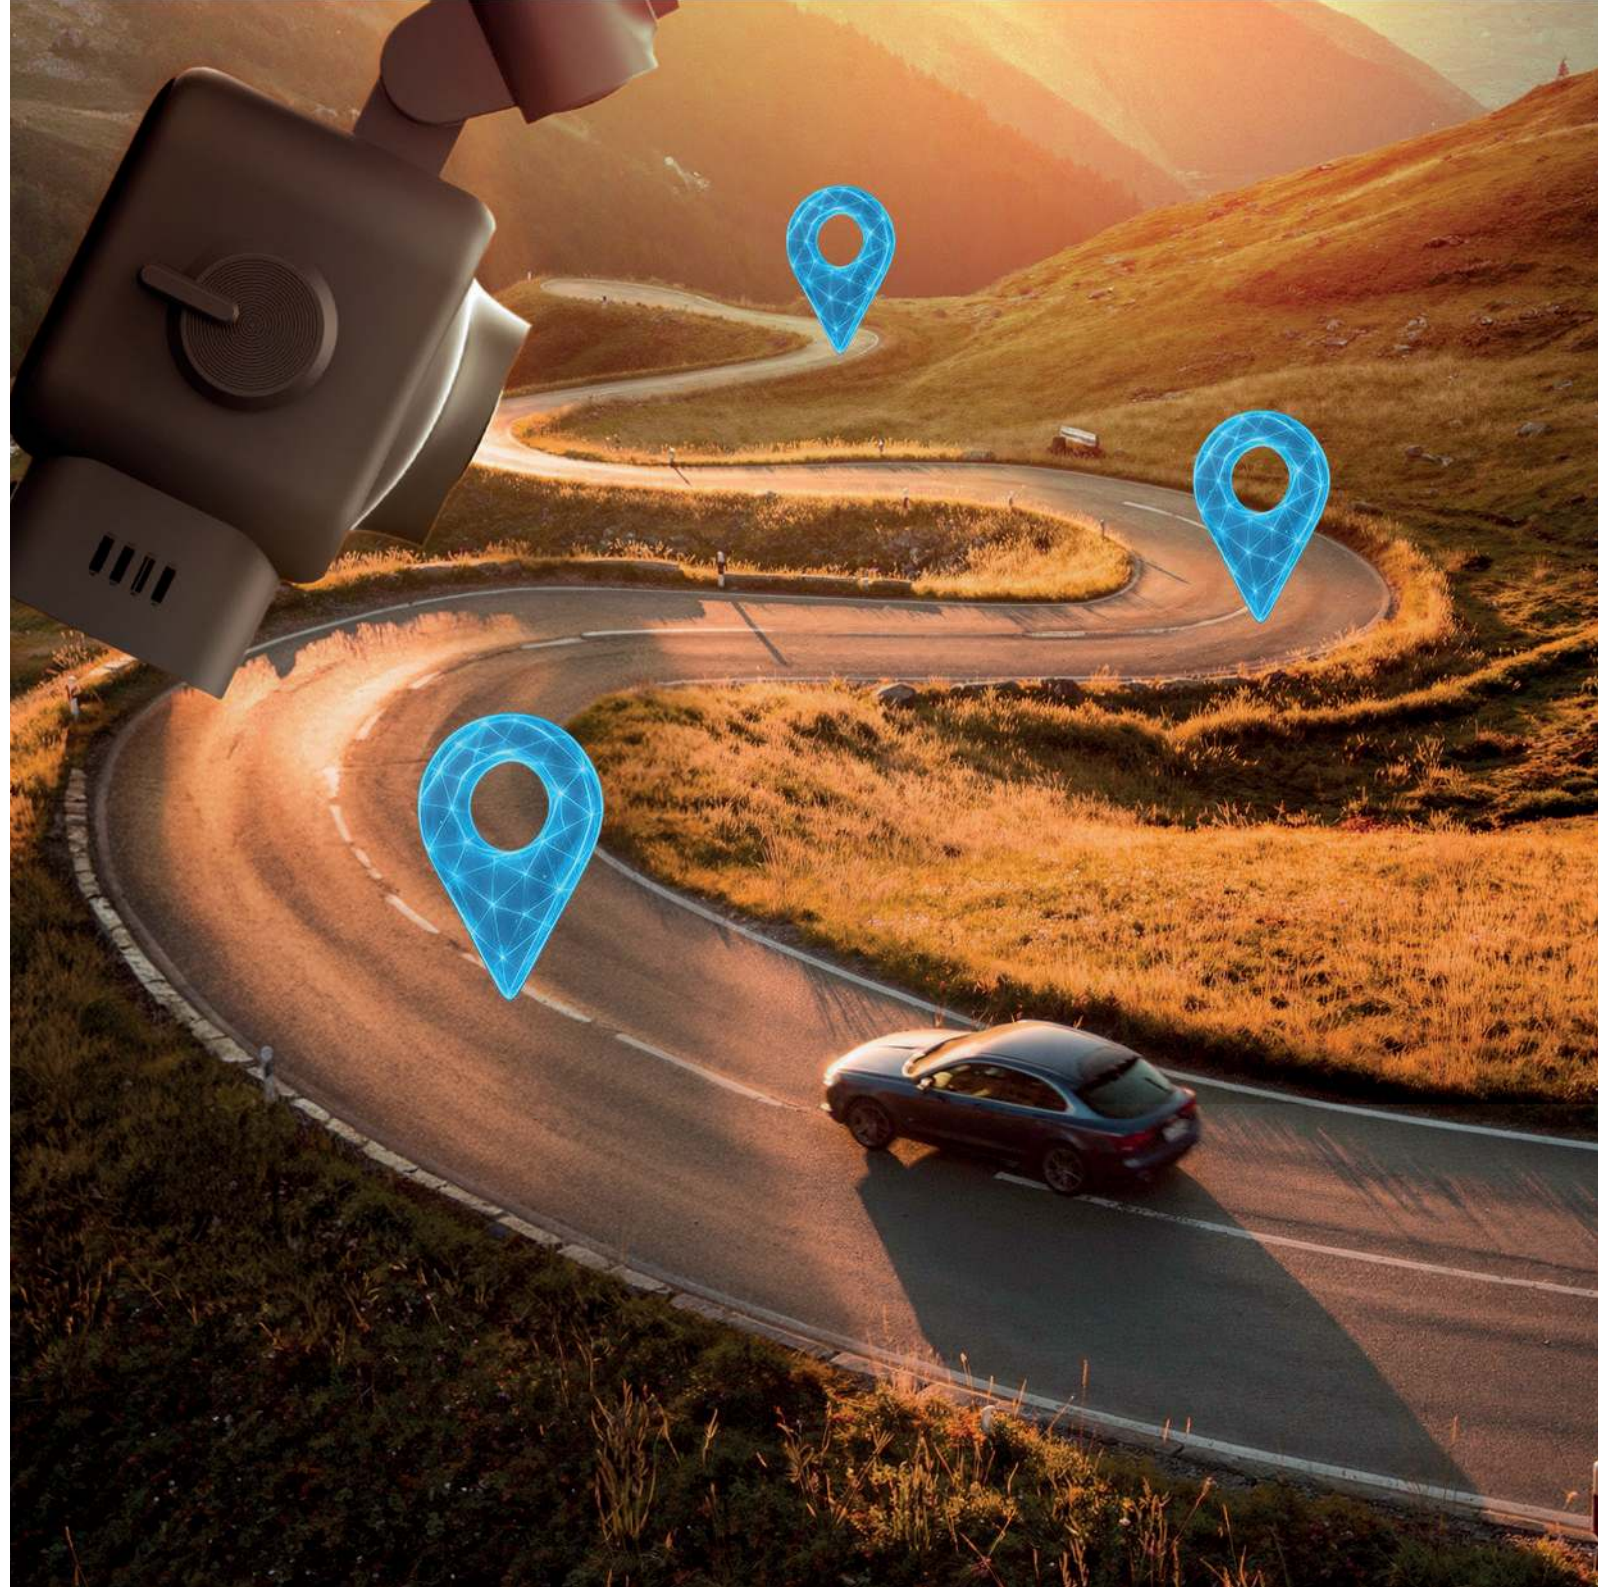

WIDER PERSPECTIVE, GREATER SAFETY

Wide-angle lenses capture a much larger area of the road, covering not only the lane ahead but also adjacent lanes and the roadside. The front dash cam offers a 140° viewing angle, the rear camera 130°, and the interior camera 120°, giving you a complete view of the situation around the vehicle. This solution minimizes blind spots and gives you greater control in dynamic situations.

PRECISE DATA FROM EVERY JOURNEY – MORE CONFIDENCE ON THE ROAD

The built-in GPS module records your route and current speed, providing additional precise information about every trip. This is not only convenient when reviewing journeys, but also serves as valuable evidence in the event of a collision or road dispute. With recorded data, you gain a more complete picture of the situation and greater confidence on every drive.

24/7 VEHICLE PROTECTION

The time-lapse recording function allows you to monitor your vehicle around the clock, capturing what happens around the car while parked, for example in a parking lot. This provides additional protection against bumps, scratches, or attempted interference. For parking mode to operate while the vehicle is stationary, the Xblitz Future 3CH dash cam must be connected to a constant power source, ensuring continuous recording and full protection for your car.

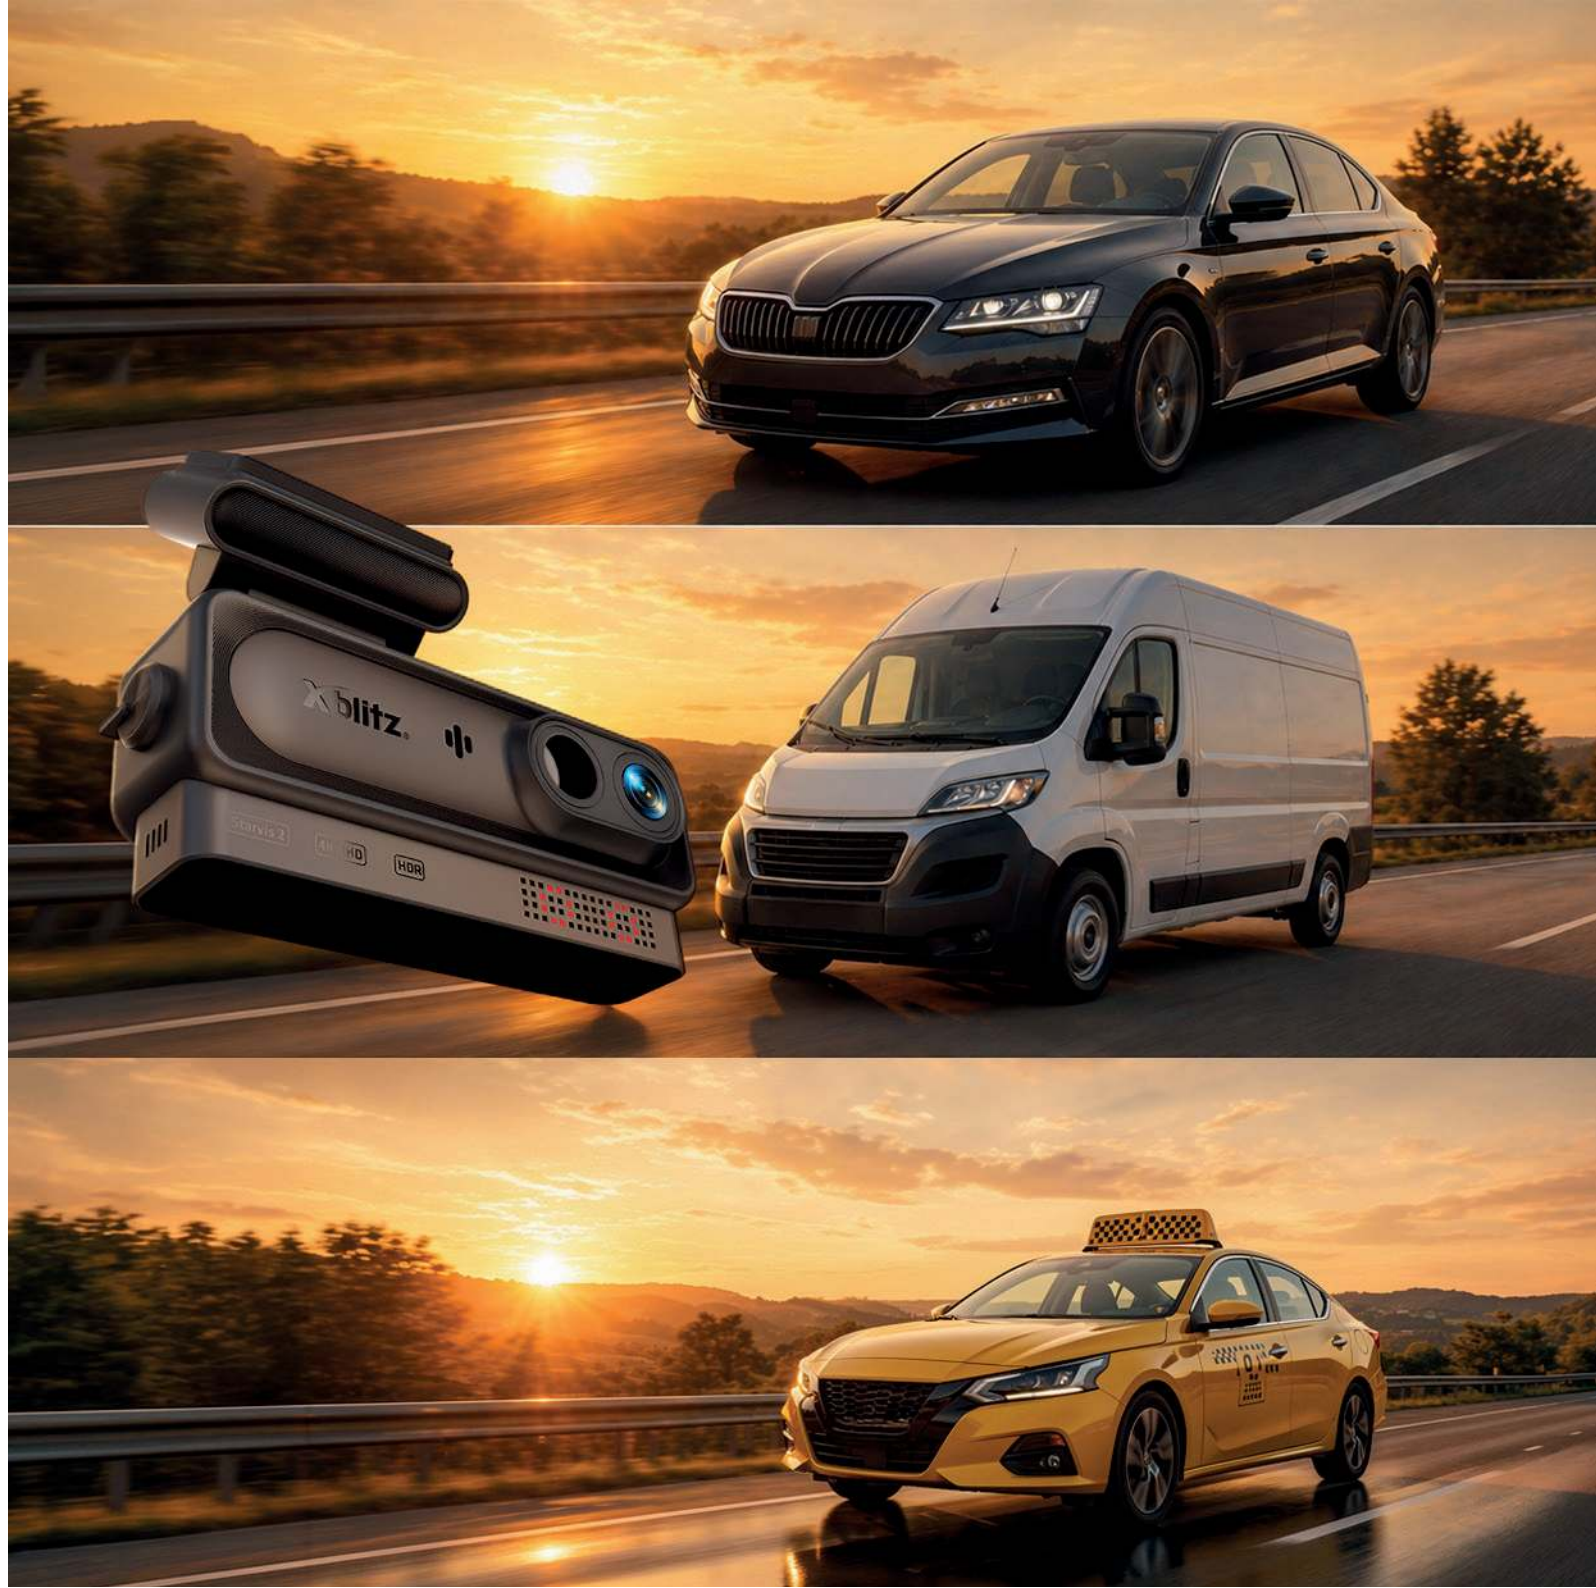

MORE STORAGE FOR RECORDINGS – FEWER WORRIES

Support for memory cards up to 512 GB allows you to store significantly more recordings without the need for frequent file overwriting. This is especially important when recording in high-resolution 4K. You can be sure that the most important footage will be available exactly when you need it. More storage means greater convenience and safety every day on the road.

PERFECT FOR ANY VEHICLE – FROM DAILY DRIVING TO PROFESSIONAL USE

The Xblitz Future 3CH 3-channel dash cam with HDR and STARVIS 2 technology is suitable for every type of vehicle – from private cars and taxis to delivery vehicles. With front, rear, and interior recording in 4K quality, you have full control over what happens both on the road and inside the cabin, whether during everyday driving or while working behind the wheel. It is a practical solution for drivers who need reliable support and clear recordings of every situation.

FAST ACCESS TO RECORDINGS AND FULL CONTROL FROM YOUR SMARTPHONE

Thanks to Wi-Fi 6 connectivity in the 5 GHz band and a dedicated mobile app, you get fast access to recordings directly on your smartphone. You can conveniently browse footage and manage camera settings in real time, without removing the memory card. Fast data transfer of up to 40 MB/s means downloading a 200 MB recording takes just 5 seconds, significantly speeding up access to your files.

CLEAR CABIN RECORDINGS, EVEN AT NIGHT

Built-in IR infrared LEDs allow the interior camera to record video even in very low light conditions. The inside of the vehicle remains monitored around the clock, regardless of lighting or time of day. This is especially useful during night drives or when parked in poorly lit areas, where full visibility and control over what happens inside the cabin are essential.

CLEAR IMAGE, EVEN IN THE DARK

Super Night Vision mode enhances recording clarity after dark, allowing you to capture more details even in limited lighting conditions. The Xblitz dash cam effectively reduces noise and improves contrast, ensuring that important elements such as silhouettes or license plates remain clearly visible. As a result, you can be confident that your recordings will stay sharp and useful regardless of the surrounding conditions.

STABLE PERFORMANCE EVEN IN EXTREME CONDITIONS

Xblitz Future 3CH is a dash cam equipped with a modern supercapacitor, ensuring reliable operation in conditions where traditional batteries fail. Whether it's freezing cold or intense heat, the device works stably across different temperatures. This means greater durability, no battery discharge issues, and confidence that the dash cam will start exactly when needed. With a long lifespan of up to 500,000 cycles, you get peace of mind for years and equipment you can rely on every day.

TECHNICAL DATA

Xblitz® FUTURE 3CH

Wi-Fi:	2.4G/5.8G
Dedicated app:	Yes (Android & iOS)
GPS:	Yes
Display:	3.2" IPS
Processor:	Novatek 98529
Front / interior / rear sensor:	Sony STARVIS 2 IMX678/GC2053/GC4663
Recording angle (FOV):	Aperture (F/NO): 140° f/1.75 (front), 120° f/2.0 (interior/middle),
Maximum recording resolution (front / interior / rear):	130° f/1.8 (rear) Front: REAL UHD 4K (3840 × 2160) 30 fps, interior/middle: FHD 1080P (1K) (1920 × 1080) 30 fps, rear: QHD 2K (2560 × 1440) 25 fps
Codec:	H.265
Video format:	MP4
G-sensor:	Yes
Parking mode:	Yes – G-sensor / Time-lapse (requires hardwire power kit)
Loop recording:	Yes
Memory card support:	Yes, up to 512 GB
Power supply:	USB Type-C
Operating temperature:	-20°C to 70°C
Supercapacitor:	Yes
Package contents:	Dash cam, rear camera with power cable (~6 m), car charger with 3.5 m cable, mount with adhesive tape, electrostatic sticker, microSD card reader, user manual
Dimensions:	przód: 115x50x33mm, tył: 70x30x35mm
Weight:	przód: 190g, tył: 36g
Box dimensions:	146x114,5x96,5 mm
Box weight:	675g
