INTUITIVE OPERATION

The Xblitz FX1 Classic holder uses a gravity-based mechanism. The arms open when you press the button located on the back of the device. This allows you to place your smartphone quickly and easily with just one hand.

CLASSIC DESIGN

A minimalist form and matte black finish make the FX1 holder a perfect match for any car interior. With no unnecessary details and a compact structure, it emphasizes a sleek, technical character. It's a practical choice for those who appreciate simplicity and visual consistency.

A black car phone mount is shown holding a smartphone. The mount is attached to a car's dashboard. Two sets of red arrows point towards the side grips of the mount, indicating they are adjustable. The background is a blurred view of a car's interior and green foliage outside.

FITS YOUR PHONE

The Xblitz FX1 Classic fits phones up to 9 cm wide, making it compatible with most models available on the market. The grip's arms adjust to the width of your device, keeping it stable throughout your drive.

RUBBER PADS

The inner surfaces of the holder arms are lined with soft rubber material. These pads protect your phone's body from scratches and reduce the risk of slipping—especially helpful on bumpy roads.

ADJUSTABLE **VIEWING ANGLE**

The holder allows you to adjust your phone's tilt angle, so you can position it to suit your preferences and ensure good visibility—perfect for using navigation.

DOESN'T BLOCK YOUR VIEW

Thanks to its compact size, the Xblitz FX1 Classic holder doesn't obstruct the driver's field of vision. It stays out of the way of both the road and dashboard controls. It's small, yet always within easy reach while driving.

FX HOLDER SERIES

The Xblitz FX series was designed for drivers who expect reliability, ergonomic use, and maximum comfort. The holder in this series feature smart design, precise mechanics, and a stable build. Each model ensures your device stays securely in place under any road conditions.
