FX4 ELEGANCE

AUTOMATIC CAR HOLDER
WITH WIRELESS CHARGING

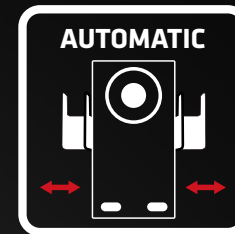

ACTIVE CAR HOLDER
WITH CHARGER

EASY
INSTALLATION

USB-C

A close-up photograph of a car's interior. A smartphone is mounted in a sleek, modern car holder. The phone's screen is on, displaying the 'Xblitz' logo in a glowing blue font. The car holder is positioned in front of the dashboard, which features a steering wheel on the left and a speedometer. The background is slightly blurred, showing the car's interior and some out-of-focus lights from outside.

WIRELESS CHARGING

The FX4 Elegance car holder features wireless charging. The device starts charging automatically once the phone is placed between the car holder's arms. The maximum charging power depends on the phone model and can reach up to 15 W.

AUTOMATIC CLAMPING

A built-in sensor detects the approaching phone and automatically closes the arms of the car holder, securing the device in place. This allows you to place your phone with one hand without taking your eyes off the road. The mechanism works smoothly and requires no additional setup.

MAXIMUM WIRELESS CHARGING POWER **UP TO 15 W**

The car holder supports fast wireless charging in four power variants: 5 W, 7.5 W, 10 W, and 15 W. The system automatically adjusts the charging parameters to match the capabilities of the specific phone model. This ensures high efficiency and protects the battery from overheating.

CLASSIC DESIGN

The FX4 car holder features a simple structure with gently rounded edges and a satin finish. Its classic design fits well with both modern and older car interiors.

ARM RELEASE BUTTON

A button located on the back of the device allows you to release the arms with a single press. Thanks to the built-in 180 mAh battery, this function is available even when the car is turned off. It's a truly convenient solution that lets you quickly and easily remove your phone without pulling or yanking.

EASY **INSTALLATION**

The Xblitz FX4 Elegance car holder can be easily clipped onto an air vent for a stable and secure mount. The entire process takes just a few seconds and requires no special skills.

POWER-FREE RELEASE

Thanks to the built-in battery, the car holder's arms can be opened even when the device is not connected to a power source. This is especially useful after turning off the engine.

FX SERIES

With the Xblitz FX series, you get full control of your device while driving. These car holders stand out with their thoughtful design, intuitive use, and reliability you can count on, no matter the road conditions.

TECHNICAL DATA

MODEL: FX4 ELEGANCE

Material:	ABS+PC+ALUMINIUM
Maximum arm span:	9,5cm
Mounting method:	Air vent clip
Charging method:	Wireless
Charging power:	15W, 10W, 7,5W, 5W
Operating temperature:	15°C to 25°C
