STABLE MOUNTING TAILORED TO YOUR NEEDS

Xblitz XM10 gives you the freedom to mount the device exactly where it is most convenient for you. Choose magnetic mounts in the form of an adhesive base or suction cup and use the multimedia station without complicated installation. This keeps the screen always within sight and close at hand, making it easier to use navigation, music and calls while driving. It is a simple way to increase travel comfort and turn your car into a modern multimedia centre.

FITS EVERY CAR

Xblitz XM10 works well in different types of vehicles, so you can enjoy the convenience of a modern multimedia station no matter what car you drive. It is a practical solution for a city car, a family estate car, a delivery vehicle or a taxi. Thanks to its universal design, you can easily adapt the device to your vehicle interior and gain convenient access to multimedia without replacing the factory radio or modifying the dashboard.

SPEAKER, MICROPHONE AND HANDS-FREE KIT IN ONE

Thanks to the combination of a speaker, microphone and hands-free kit in one device, you can conveniently make calls while driving without reaching for your phone. The XM10 car multimedia station from Xblitz makes it easier to answer calls, improves the comfort of everyday journeys and helps you stay focused on the road, with the most important communication functions always close at hand.

USE YOUR FAVOURITE PHONE FEATURES ON YOUR CAR SCREEN

Support for Android Auto and Apple CarPlay lets you conveniently connect your smartphone to the multimedia station and use key apps while driving. Thanks to 5G WiFi connectivity, the connection can work quickly and stably, ensuring comfortable use of navigation, music, calls and messages without reaching for your phone. Support for voice assistants makes it easier to control functions with voice commands, making every journey more convenient, more intuitive and better suited to the driver's everyday needs.

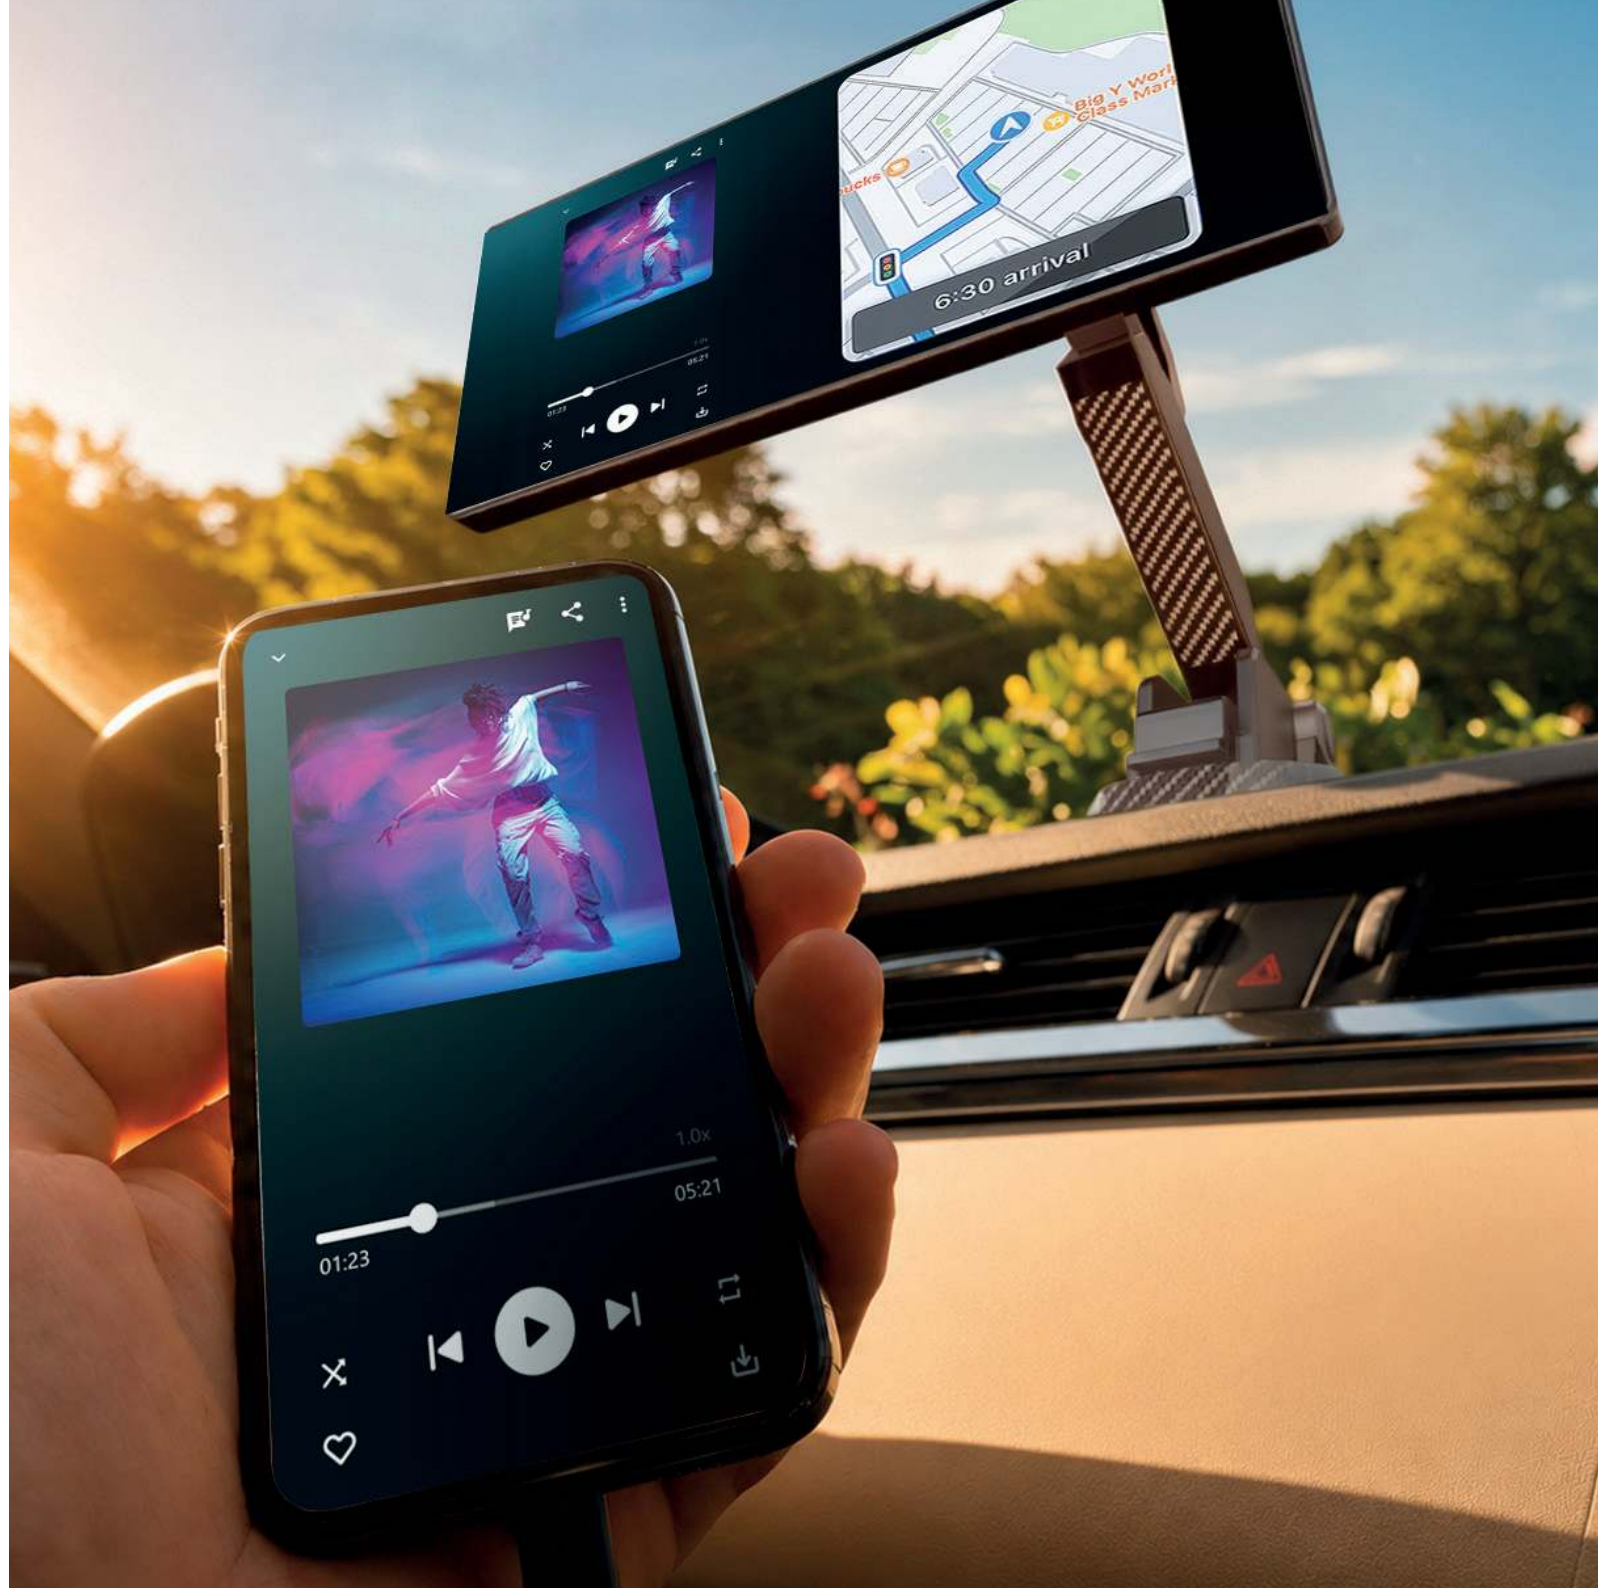

HEY SIRI, NAVIGATE TO THE NEAREST GAS STATION.

HEY GOOGLE, SEND A MESSAGE TO ANNA.

FULL CONTROL OF YOUR JOURNEY ON ONE SCREEN

The touchscreen with a resolution of 1600 × 600p provides a bright and clear image, making it convenient to use navigation, multimedia and camera previews both during the day and after dark. The split-screen function allows you to use two views at the same time. You can follow your route in navigation while controlling music, answering calls or using other multimedia functions without switching between screens. This means greater comfort, faster response and better organisation on every journey.

SAFER JOURNEYS THANKS TO THE DASH CAM

The Xblitz XM10 car multimedia station is equipped with a 4K front dash cam and an FHD rear camera. The device records your journey and lets you save important moments from the road, giving you greater peace of mind every day. You can record road situations and secure footage in the event of a collision or unexpected incident. With the Road Video app, you can conveniently download recordings to your phone. The 270° rotating camera makes it easier to adjust the recording direction to your car interior. Loop recording allows you to use the dash cam without manually deleting older files. A memory card slot of up to 256 GB provides more space for storing route recordings.

REVERSE PARK WITH MORE CONFIDENCE AND COMFORT

After connecting an additional reversing camera, Xblitz XM10 supports you while reversing by displaying the view behind the vehicle directly on the multimedia station screen. Visible parking guide lines help you better assess the distance from obstacles, position the car more precisely and maneuver more easily even in tight parking spaces. It is a practical solution that increases everyday driving comfort and gives you a greater sense of control when parking.

MONITOR THE BACK SEAT WITHOUT TAKING YOUR EYES OFF THE ROAD

An additional interior monitoring camera, sold separately, can be connected to the Xblitz XM10 multimedia station. With it, you gain a convenient view of children or passengers sitting in the back without having to take your eyes off the road. The device supports one additional camera at a time. It is a convenient feature that allows you to easily adapt the device's capabilities to your current needs and increase the comfort of everyday journeys.

LISTEN TO MUSIC THE WAY YOU LIKE

The Xblitz car multimedia station provides several convenient ways to play audio in your car, so you can easily adapt the audio connection to your vehicle and daily needs. You can use the built-in speaker, transmit sound via the BT transmitter or connect the device using AUX. This means the multimedia station lets you conveniently listen to music, navigation prompts and phone calls.

CLEAR SCREEN, EASIER OPERATION

The large 10.26" screen in Xblitz XM10 provides convenient and clear access to the most important functions while driving, while the touch panel makes operation quick and intuitive. This allows you to comfortably use navigation, music, calls, camera preview and multimedia functions without searching through unnecessary settings. As a result, you gain greater everyday convenience and keep everything under control on one clear screen.

EVERYTHING YOU NEED IN ONE SET

The set includes everything you need to start using Xblitz XM10 conveniently in your car: the multimedia station, reversing camera with power cable, charger, magnetic mounting stand, magnetic suction cup mount and AUX cable. With the complete set of accessories, you can easily install the device, connect the necessary accessories and immediately use navigation, multimedia, calls and parking support.
