SMART SAFETY MIRROR

SEE MORE – PROOF IN EVERY SITUATION

Xblitz Reflex 4K Professional is a modern 4K mirror dash cam that increases safety, visibility, and control during every drive. Automatic route recording, a G-Sensor securing files, and overwrite protection ensure you always have access to the most important footage.

Xblitz Reflex 4K Professional is the perfect solution for:

- city drivers,
- people who often park in difficult conditions,
- Uber/Bolt drivers,
- anyone who wants to enhance their car's safety.

TRUE 4K QUALITY + HDR

Capture every detail with Xblitz Reflex 4K Professional. The mirror dash cam records in 4K at the front and Full HD at the rear, while HDR technology ensures excellent visibility both day and night. License plates and details remain clear even in motion.

VOICE CONTROL

Xblitz Reflex 4K Professional gives you full control without taking your hands off the steering wheel. Save files, take photos, and start recording using voice commands. This 4K mirror dash cam from Xblitz combines convenience and safety. The device also recognizes commands in English.

ALWAYS READY TO WORK

The loop recording function ensures continuous recording by automatically overwriting the oldest files when the memory card is full. This eliminates the need for manual deletion and guarantees uninterrupted recording of every trip. This way, the device is always ready to operate, and you don't have to worry about running out of space - even during long journeys or when parked. When you're away, the Xblitz dash cam protects your car from damage. Please note that this mode requires a constant power supply.

STRESS-FREE REVERSING

The Xblitz Reflex 4K Professional dash cam is equipped with a rear camera that records the view behind the vehicle, increasing safety while driving and maneuvering. It automatically activates the rear view when reversing, making it easier to judge distances - even in tight spaces - performing better than a traditional mirror. The camera supports real-time reversing view.

WI-FI AND MOBILE APP

With Xblitz Reflex 4K Professional, you can manage recordings directly from your smartphone - view, download, and save files without removing the memory card. Enjoy full convenience and control anytime, anywhere.

NIGHT VISIBILITY THAT MAKES A DIFFERENCE

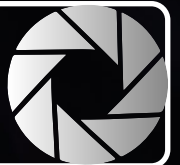

The Xblitz Reflex 4K Professional uses a modern STARVIS 2 sensor that significantly improves recording quality in low-light conditions, delivering clear, bright, and detailed footage even at night. Key elements such as license plates and road markings remain readable regardless of the time of day.

ADAS SYSTEM – EXTRA AWARENESS

Xblitz Reflex 4K Professional supports the driver with the ADAS system, which warns about lane departure, monitors distance, and analyzes road situations. This technology enhances safety on every journey and helps you react faster to potential hazards or unexpected events.

VISIBILITY WITHOUT BLIND SPOTS

Replace your traditional mirror with a digital display in Xblitz Reflex 4K Professional. A wider field of view, better visibility in rain and at night, and no obstruction from passengers or luggage increase driving comfort and safety. You can easily switch the view with a single gesture.

GPS – MORE THAN JUST RECORDING

With the GPS module, Xblitz Reflex 4K Professional records your route, speed, and location, increasing the evidential value of recordings. This gives you confidence and peace of mind on every journey.

G-SENSOR RECORDING PROTECTION

The Xblitz Reflex 4K Professional dash cam is equipped with a G-Sensor that automatically detects sudden events such as hard braking or collisions. The system instantly protects important recordings from being overwritten, ensuring they remain safe and always accessible when needed. This gives you confidence that the most crucial moments are preserved and can serve as valuable evidence in disputed situations.

UP TO 512 GB OF RECORDINGS

With the GPS module, Xblitz Reflex 4K Professional records your route, speed, and location, increasing the evidential value of recordings. This gives you confidence and peace of mind on every journey.

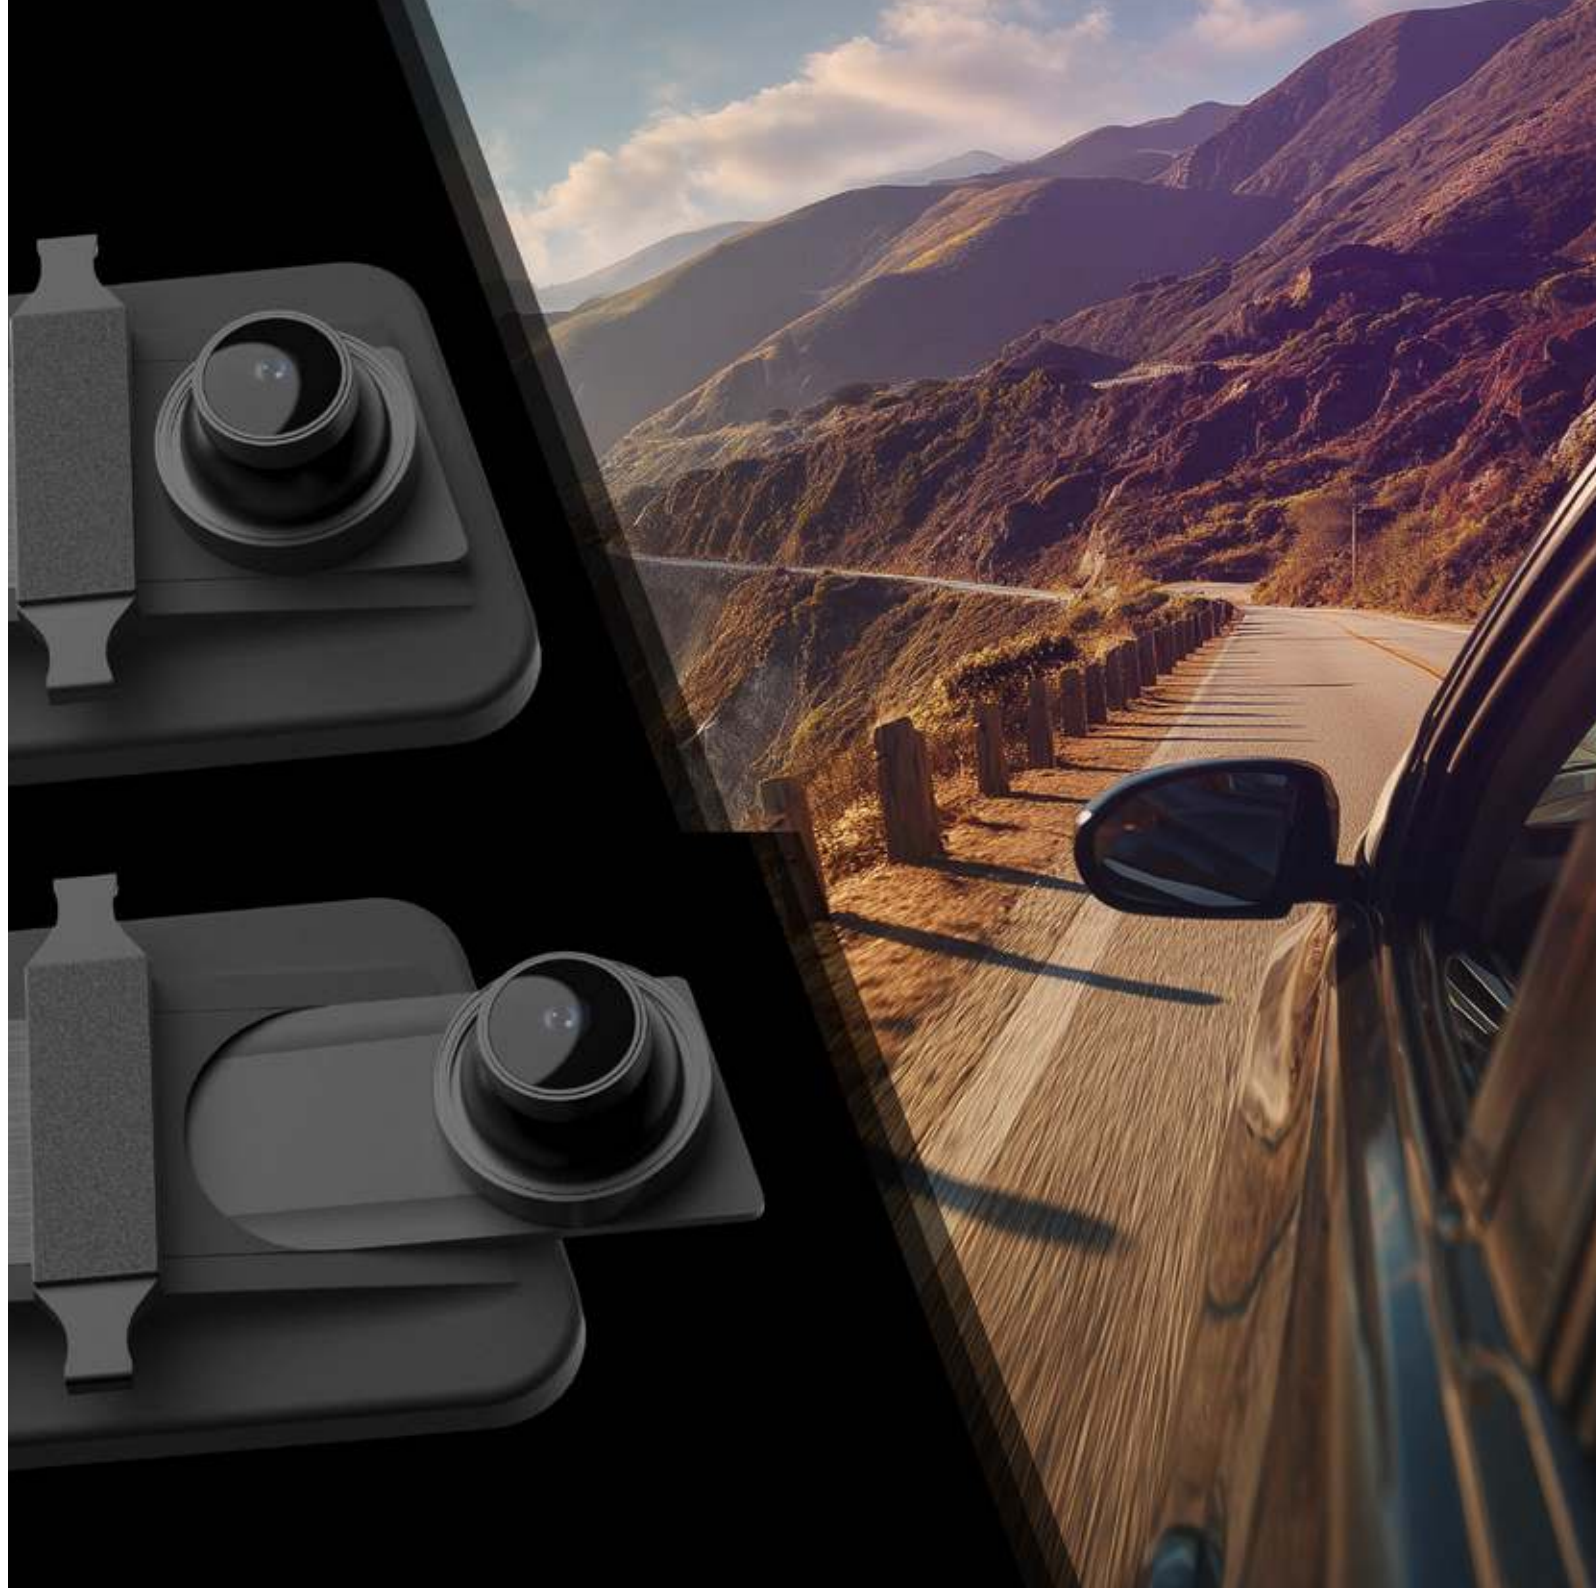

HDR COLOR QUALITY

The device uses HDR technology to ensure excellent color reproduction and balance between bright and dark areas of the image. This results in extremely clear and detailed recordings, whether you travel during the day or at night.

FITS ANY CAR

The adjustable lens of Xblitz Reflex 4K Professional allows you to perfectly set the recording angle and adapt the device to any interior. This eliminates blind spots and ensures maximum recording efficiency. The Xblitz camera features a large 9.66" IPS touchscreen and intuitive operation, making it look and function like factory-installed equipment.
