MAGBOOST

POWERBANK 10 000 mAh

LARGE CAPACITY 10000 mAh

WIRELESS CHARGING

QC 22,5W

PD 20W

COMPATIBLE WITH THE MagSafe® *

*MagSafe® is a registered trademark of Apple Inc.

LAUR KONSUMENTA 2023

Strong magnetic connection

Xblitz Magboost is equipped with a magnetic mounting system that ensures the device adheres securely to the surface of the powerbank.

The stable connection improves wireless charging efficiency and eliminates the risk of accidental interruption while on the move.

Wireless charging

The Magboost powerbank supports inductive charging up to 15 W. The magnetic connection is activated automatically when a phone is brought close to the powerbank's surface.

The entire process is cable-free, and a built-in safety system ensures proper charging by protecting the device from overheating and overloading.

Fast wired charging

Built-in ports (USB-A, USB-C, and Lightning) provide compatibility with various devices and allow simultaneous charging of multiple electronics.

Xblitz Magboost supports Power Delivery (PD) and Quick Charge (QC) technologies, enabling fast charging of the powerbank itself as well as any connected smartphone, tablet, or e-book reader.

PD 20W

QC 22,5W

Fast powerbank charging

Thanks to Power Delivery 3.0 support, the powerbank can be quickly recharged using compatible adapters. Integrated power management systems not only optimize charging time but also ensure battery safety by cutting off power once full capacity is reached.

LED display

A clear LED display shows the current battery level of the powerbank. When fast charging mode is active, a green lightning icon appears on the screen. This indicator is visible even in low light, allowing constant monitoring of device operation.

Built-in safety features

Charging is controlled by a system that automatically stops power delivery once the connected device is fully charged. This eliminates the risk of overcharging, protects the battery, and reduces standby energy consumption.

An integrated protection system ensures safe operation even during intensive use by preventing overheating, short circuits, and deep discharge.

USB-A/ USB-C / Lighting ports

Thanks to the included USB-C cable with USB-A adapter, users can charge most devices available on the market without needing extra cables.

Compact and portable

Xblitz Magboost is small and lightweight, making it easy to carry in a pocket, bag, or glove compartment. Its compact form allows you to have it with you at all times.

Large 10 000 mAh capacity

The internal lithium-polymer battery with a capacity of 10,000 mAh provides enough energy to recharge mobile devices multiple times.

Perfect for travel

Thanks to its compact design and wireless charging capabilities, Xblitz Magboost is a universal power source ideal for use on the go.

TECHNICAL SPECIFICATIONS

Model: **XBLITZ MAGBOOST**

Battery capacity:	10000mAh, 37Wh/3,7V
Material:	ABS
Battery type:	Lithium-polymer
Ports/ connectors:	USB Type-C, input: 5V-3A/9V-2A/12V-1,5A USB Type-C, output: 5V-3A/9V-2,22A/12V-1,66A USB Type-A, output: 4,5V-5,0A/5,0V-4.5A/ 9V-2,0A/12V-1,5A (Max 22,5W) USB lightning**, input: 5V-2,1A
Magnetic charging:	15W/10W/7.5W/ 5W
Dimensions:	103x66x18mm
Weight:	183g
Included in the box:	Power bank, user manual, micro USB cable with adapter
EAN:	5902479675763
PN:	XBL-LIF-PW003
Contact:	tel: 12 307 07 15; mail: sklep@xblitz.pl
Address:	KGK Trend sp. z o.o. ul. Ujastek 5B, 31-752 Kraków
