RECORDING 170°

THREE CAMERAS. CONTROL FROM EVERY ANGLE

Get a complete view of every situation on the road thanks to recording from three perspectives simultaneously. Xblitz Vector 3CH captures the road ahead in high-quality 2.5K, the interior of the vehicle, and what's happening behind the car in Full HD.

This ensures you always have comprehensive evidence at hand – whether it's a road incident, something happening in the back seat, or during parking.

Front Camera

Records the road in front of the vehicle in 2.5K resolution

Interior Camera

Records the inside of the car in FHD quality, ideal for professional drivers

Rear Camera

Records the road behind the vehicle in FHD quality

WIDE VIEWING ANGLE – NOTHING GOES UNNOTICED

The wide 140° viewing angle of the Xblitz dash cam covers much more than just what's directly in front of you – it also includes adjacent lanes and the roadside.

Additionally, the interior camera offers an even wider 170° perspective, capturing more details. This means greater control in dynamic situations and the ability to monitor the back seat without distraction.

CLEAR DETAILS THAT MAKE A DIFFERENCE

Record in 2.5K quality and enjoy
an image full of important details.

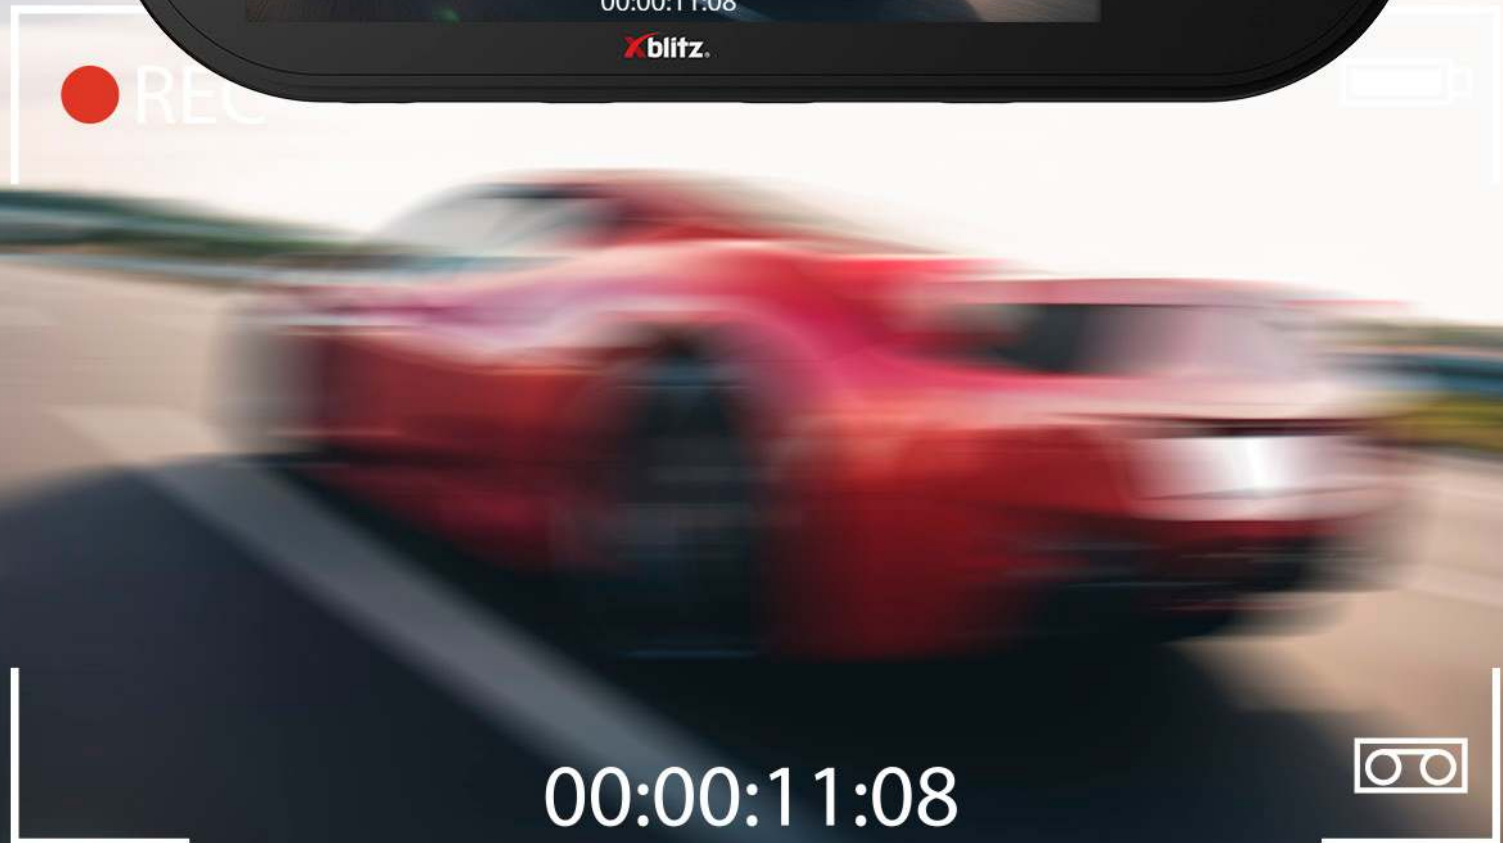

Higher resolution allows you to
capture more – license plates, road
signs, and surroundings – making
every recording clear and precise.

SMOOTH IMAGE WITHOUT DISTORTION

The main camera records at 30 frames per second, ensuring smooth, natural footage without stuttering or blurring.

Every movement, even at higher speeds, is accurately captured, allowing you to record key moments with full precision and detail. The Xblitz Vector 3CH 3-channel dash cam with rear camera ensures nothing important is missed.

INSTANT ACCESS TO RECORDINGS - NO CABLES

With Wi-Fi 6 connectivity, you can quickly connect to the dash cam and manage recordings directly from your smartphone.

Fast file transfers, live preview, and convenient settings give you full control over the Xblitz Vector 3CH – without removing the memory card or dealing with unnecessary complications.

GPS RECEIVER - FULL HISTORY OF YOUR ROUTE

The built-in GPS records not only video but also key route data such as speed and location.

This provides more complete evidence, which can be invaluable in the event of a collision or dispute on the road.

AUTOMATIC RECORDING PROTECTION WITH G-SENSOR

The built-in G-sensor detects sudden events such as hard braking or a collision and automatically protects the recording from being overwritten.

You don't have to do anything – the most important moments are saved, giving you confidence and ready-to-use evidence.

PROTECTION FOR YOUR CAR, EVEN WHEN YOU'RE NOT DRIVING

Parking mode ensures the Xblitz Vector 3CH monitors your vehicle even when you're away. The dash cam automatically starts recording when it detects shocks or motion, capturing events such as bumps or attempted damage.

To enable continuous operation, the device must be connected to a constant power supply kit. This way, your car is monitored 24/7, and every event is recorded.

ALWAYS READY FOR NEW RECORDINGS

Loop recording means you never have to worry about running out of space on your memory card.

The Xblitz Vector 3CH automatically overwrites the oldest files with new ones, ensuring continuous operation and recording of your current journey. You focus on driving – the rest happens automatically.

MAXIMUM FUNCTIONALITY, MINIMUM SPACE

Its compact size ensures the Xblitz Vector 3CH dash cam does not obstruct your view while driving and fits perfectly into your car's interior.

It's almost invisible from the outside while always ready to operate – offering comfort and aesthetics without compromise.

RECORD WITHOUT LIMITS

Support for microSD cards up to 256 GB allows you to conveniently store all your recordings.

You can easily manage files, transfer them to other devices, and adjust storage capacity to your needs – without unnecessary limitations.

TECHNICAL SPECIFICATIONS

Xblitz® VECTOR 3CH

Wi-Fi:	WiFi 6 support
Dedicated app:	Android and iOS
