

PoleHolder road pole mounting anchor / basket 18x18x40 cm

(Product ID: 912)

Model name: PoleHolder 18x18x40

Overall height: 40 cm

Mounting hole spacing: 180 x 180 x 400 mm / M14

Material: steel A-III

Unit packaging dimensions: 40 x 28 x 3 cm

Dimensions of packaging: 40 x 33 x 28 cm

Volume of packaging: 0,037 m³

Quantity per package: 10 pcs.

Weight: 2.5 kg

Quantity per pallet: 200 pcs.

SKU code: 48152

EAN code: 5906647991518

PoleHolder 18x18 - StreetPole MAX light pole mount

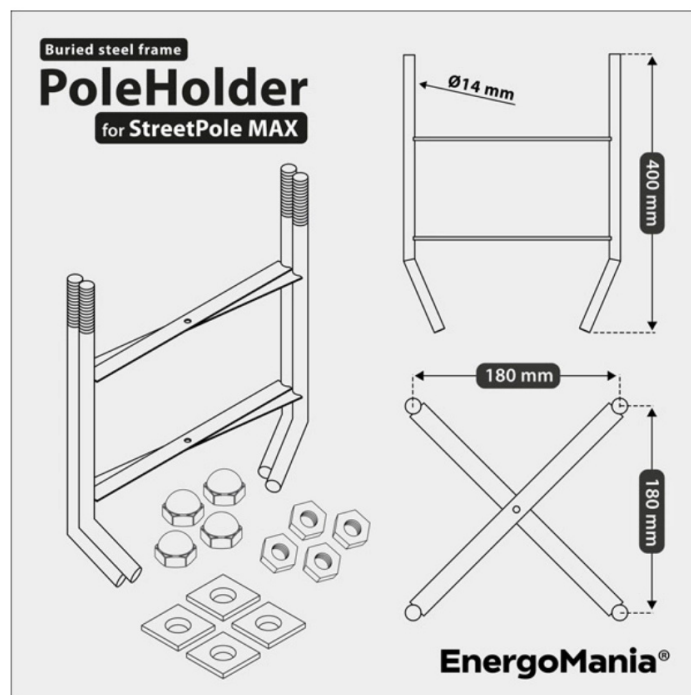

Series of ready-made mounting baskets **PoleHolder** brand **EnergoMania**® significantly simplifies and speeds up the installation of segmented lighting poles **StreetPole MAX** and **RetroPole**. Anchors, thanks to their foldable, scissor-like design **take up little space** during transport, after unfolding to the installation position **are locked by bending the wings of the central plates**.

Solid foundation anchor

Ready-made mount **PoleHolder 18x18** is made of four solid rebars **diameter Ø14 mm / length of 400 mm**, connected by transverse plates. **Screw spacing** when the anchor is extended is **180 x 180 mm**. The lower ends of the basket for better grip in concrete are bent inward.

The anchor set includes:

- ✓ 4x **nut M14**
- ✓ 4x rectangular **washer M14**
- ✓ 4x cap **masking cap** nakrętki

Excavate, settle and pour concrete...

It will take you less than an hour to prepare the foundation for the installation of the StreetPole. Simple and quick installation in four steps:

- 1 Excavation 🛠 hole in the ground for formwork
- 2 Pour concrete 🧱 prepared structure
- 3 Settle and level 📐 reinforcement basket
- 4 Zamontuj 🌳 lighting pole

⚠ If you plan to run power cables 🔌, **remember to make a cable conduit** when pouring concrete.

Make installation easy and use PoleHolder's ready-made reinforcement baskets!
