

Non-flammable compressed gas

A professional product designed for contactless cleaning of electronic, optical and precision devices. The Non-flammable Compressed Gas can be safely used even in environments with an increased risk of ignition, thanks to its special non-flammable formula. The integrated 360° valve allows for effective removal of dust and debris in any orientation — including upside down — without the risk of damaging sensitive components. The product leaves no streaks or residue, making it an ideal choice for cleaning delicate surfaces. Commonly used for the maintenance of household and consumer electronics, computers and cameras, as well as in precision mechanics and optics.

Product features:

- ✓ non-flammable formula, safe to use,
- ✓ high efficiency in removing dust and contaminants,
- ✓ precise cleaning with no risk of damage,
- ✓ leaves no streaks or residues,
- ✓ 360° valve for easy cleaning in any position.

Applications:

- ✓ electronics and computers,
- ✓ precision mechanics,
- ✓ electromechanics,
- ✓ photography equipment,
- ✓ consumer and household electronics.

Physicochemical properties

Appearance	Colorless gas
Odor	No unpleasant odor
Density at 20°C	1.2 g/cm ³
Pressure at 20°C	420 kPa
Flow rate	17 g/10 s
Flash point	>470°C
pH	Neutral
Water content	None
Water solubility	1.5 g/l
Shelf life	3 years

Compatibility:

The Non-flammable Compressed Gas is safe for most electronic devices, precision mechanisms, and consumer electronics. Its non-flammable formula and streak-free performance ensure safe and effective cleaning of delicate components without risk of damage.

Application method	
Aerosol	Yes

Usage instructions:

Restricted to professional users. Read safety data sheet carefully prior to use.

This product is intended for professional use only. Before use, carefully read the safety data sheet. Do not shake the can before application. Aim the nozzle at the area to be cleaned, holding the container upright or at any angle. Thanks to the 360° valve, it allows easy access to hard-to-reach areas. For use on electrically powered devices, it is recommended that the ambient temperature remain below 28°C to further reduce potential hazards. Always use in a well-ventilated area, avoid direct eye contact and do not apply to devices that are plugged in or powered on.

Package
Aerosol

200 ml (ART.AGT-255) - 4/12 pcs.*

*Quantity of pcs. in a bulk package.

Storage:

Store in tightly sealed containers and in dry, well-ventilated areas, away from sources of heat, ignition and direct sunlight. Do not expose to temperatures exceeding 50°C/122°F. Protect against electrostatic discharges.

Technical support:

AG TermoPasty provides technical support, answering questions about the technical specifications and applications of our products. Please contact us via email at info@termopasty.pl.

Note:

The data presented in this document reflects our current level of knowledge and describes the typical properties and applications of the product. However, the responsibility for determining its suitability for specific applications lies with the user. AG TermoPasty is not liable for the results of product use, as the conditions of application fall beyond our control.
