XBLITZ FALCON **PREMIUM DASH CAM** **WITH REAR** **CAMERA**

The Xblitz Falcon is a premium-class dash cam that combines superior image quality with advanced safety features. Recording in stunning 4K resolution, it captures not only what happens in front of your vehicle, but also behind it—ensuring complete protection in every situation. Its elegant design and cutting-edge technology blend seamlessly with the interior of any modern car.

PREMIUM

DUAL 4K UHD QUALITY

With 4K UHD resolution in both the front and rear cameras, every detail of the road is captured with exceptional sharpness. Whether you're driving through the city or covering hundreds of kilometers on the highway, the Xblitz Falcon delivers crystal-clear recordings with natural colors. Such high image quality makes it easy to read license plates, road signs, and other crucial details - so every recording looks sharp and professional.

DUAL CAMERA—DUAL RECORDING

The dash cam works in tandem with the rear camera, which—just like the front unit—records in 4K, features a Sony Starvis 2 sensor, and supports HDR technology. Thanks to this, the Xblitz Falcon delivers consistent, top-quality footage from every angle. Simultaneous recording from both the front and rear of the vehicle provides a complete account of road events, enhancing the evidential value of the recordings and giving drivers a true sense of control.

PREMIUM

The advertisement features a black Xblitz Falcon dash cam on the left, angled towards the right. Its lens is prominent, showing a reflection of the aurora. The background is a composite image of a snowy mountain range under a night sky with a vibrant aurora borealis. A smartphone is positioned in the center-right, displaying the same mountain scene on its screen. The phone's interface includes a grid icon, up and down arrow keys, and a home button icon. The Xblitz logo is visible on the phone's bezel. A red horizontal bar is at the top right, and a yellow 'PREMIUM' badge is at the bottom right.

2X SONY STARVIS 2

Both the front and rear cameras of the Xblitz Falcon are powered by Sony Starvis 2 technology. The front camera features the IMX678 sensor, while the rear is equipped with the IMX675—both designed to capture flawless detail in low-light conditions. With their high sensitivity, the device reveals more at night, delivering bright and clear recordings. In practice, this means license plates, road signs, and other critical elements remain legible even after dark. The footage stays natural, bright, and full of clarity—whether you're driving through the city at dusk or navigating long night routes outside urban areas.

PREMIUM

SMOOTH 60 FPS RECORDING

The cameras allow recording in 2K resolution at 60 frames per second. This ensures exceptionally smooth and sharp footage—crucial when driving dynamically or performing sudden maneuvers. Recordings in this mode are easier to analyze and capture every detail of the road situation. At the same time, the Xblitz Falcon also supports 4K UHD recording, delivering maximum image clarity and detail.

Xblitz. FALCON
4K HDR

WI-FI CONNECTIVITY

The Xblitz Falcon supports dual-band Wi-Fi in both 2.4GHz and 5GHz frequencies. This makes it easy to connect the camera to your smartphone, where—using the dedicated Android and iOS app—you can download recordings, access GPS data, and conveniently adjust device settings. The 5GHz band ensures ultra-fast transfer speeds, even for 4K files, while 2.4GHz guarantees stable performance in all conditions.

PREMIUM

GPS RECEIVER

The precise GPS Module in the Xblitz Falcon embeds your driving coordinates, speed, and route directly into the recordings. This means every video contains not only image and sound, but also location data - enhancing the credibility of the footage and allowing you to accurately retrace your journey.

PREMIUM

SYSTEM ADAS

The ADAS system supports the driver during everyday journeys. The Xblitz Falcon camera analyses the surroundings and sends audible warnings at key moments – informing you of unintentional lane departure or approaching the vehicle in front too quickly. This is an additional level of awareness that increases driving comfort and allows you to react faster before a potential hazard turns into a dangerous situation.

ADVANCED HDR

With the Xblitz Falcon, you can be sure your recordings stay clear at any time. Super HDR technology precisely balances differences between bright and dark areas, ensuring footage is rich in detail—whether in full sunlight or after dusk.

BRIGHT LENS –CLEAR IMAGE

The front camera lens of the Xblitz Falcon features an exceptionally bright F1.75 aperture that lets a large amount of light reach the sensor. As a result, footage remains sharp and well-lit even in challenging nighttime conditions. The rear camera, equipped with an even brighter F1.55 aperture, captures even more light—delivering recordings that are highly detailed and full of natural colors, both day and night. The set also includes a CPL polarizing filter, which reduces glare and unwanted reflections from surfaces such as the windshield or dashboard. The effect? Recordings that are clear, high-contrast, and professional-looking—where every detail, from road signs to vehicle silhouettes, stays perfectly readable.

PREMIUM

The background image is a wide-angle shot of a two-lane asphalt road that curves into the distance. The road is flanked by dry, yellowish-brown grass and some patches of snow or frost. In the background, there are dark, rolling hills under a cloudy sky. Overlaid on the right side of the image is a large, dark, metallic-looking car body. A circular camera lens is visible, showing a distorted, wide-angle view of the road ahead. The lens has a purple and green chromatic aberration effect. The overall tone is dramatic and emphasizes the wide field of view.

WIDE ANGLE LENS

Thanks to the wide-angle lens, you can capture much more than just the road ahead of your car. The camera also records adjacent lanes and the roadside, allowing you to recreate the full picture of the situation on the road. This is particularly important in disputed situations or during unexpected events – you can be sure that the recording will show every detail and the entire context of the event.

PREMIUM

G-SENSOR

The built-in G-sensor detects sudden shocks, hard braking, or collisions. In such situations, the Xblitz Falcon automatically locks the current recording, preventing it from being overwritten. This ensures that crucial footage remains safe and accessible, providing undeniable evidence in the event of any disputed road incidents.

PREMIUM

00:00:00 **MOTION DETECTION**

The Xblitz Falcon allows for automatic recording even when the car is parked. With the motion detection feature, the camera will begin recording as soon as it detects any movement within its field of view. This ensures you can quickly check what happened around your vehicle during your absence.

PREMIUM

PARKING MODE

The Xblitz Falcon features a parking mode that can operate in three different ways. In time-lapse recording mode, the camera captures footage at longer intervals, using minimal power and storage. With motion detection mode, the device stays in standby and automatically starts recording when it detects movement within its field of view. The collision detection mode activates recording when a shock or impact is detected, allowing you to capture incidents like minor accidents or acts of vandalism. These features ensure the Xblitz Falcon is always monitoring your vehicle's safety*.

*Requires a permanent power supply kit, sold separately.

LOOP RECORDING

The video recorder records continuously, automatically overwriting the oldest files when the memory card is full. This means that Xblitz Falcon is always ready to record new events without the need to manually delete footage. Protected recordings – e.g. thanks to the G-sensor – remain intact and cannot be overwritten, which guarantees the complete security of key evidence.

PREMIUM

UNIVERSAL APPLICATION

The Xblitz Falcon is designed with various drivers in mind - it works perfectly in both passenger cars and larger vehicles. It's ideal for trucks and heavy-duty vehicles, where reliable recording of long trips and full documentation of the journey are essential. The device can be easily mounted on the windshield of any vehicle, whether you're driving a compact car or a lorry.
